

MUHAMMED MUBASHIR K

React Developer | React.js | Next.js | React Native | TypeScript

Kerala, India | muhammedmubashirwork@gmail.com | +91 8089433955 | github.com/MuhammedMubashir-dev | linkedin.com/in/muhammed-mubashir-k | muhammed-mubashir-portfolio.netlify.app

Professional Summary

React Developer with production experience shipping web and mobile applications using React.js, Next.js, and React Native. Built a multi-tenant Next.js e-commerce platform with production theme packs, delivered bilingual English and Arabic storefronts with RTL support, and developed a React Native business networking app. Skilled in REST API integration, SSR and ISR performance optimization, payment gateway integration, and responsive UI development. Also experienced in Flutter for cross-platform mobile development.

Experience

Jr Application Developer

ENKE Consulting Services LLP | Jul 2026 - Present

- Engineered a multi-tenant Next.js e-commerce platform with 8+ production theme packs, tenant onboarding, and KV-based tenant switching serving live client storefronts.
- Built live search autocomplete with debounced requests and request cancellation, integrated across multiple theme navigation bars with Algolia-powered product discovery.
- Developed a React Native business networking app with company profile management, connection requests, subscription handling, and deep link integration.
- Delivered bilingual English and Arabic storefronts with full RTL layout support, i18n translation systems, ISR caching, dynamic SEO metadata, and sitemap generation.
- Integrated Razorpay across tenant checkouts and mobile apps; built OTP authentication, guest checkout, and COD flows with WhatsApp order notifications.
- Built Flutter mobile applications for POS operations and logistics, covering billing, inventory management, and delivery workflows.

Full Stack Developer Trainee

ENKE Consulting Services LLP | Apr 2026 - Jul 2026

- Integrated REST APIs for authentication, product catalogs, orders, and checkout across Next.js storefronts and Flutter applications.
- Built dynamic category-driven property filters with multi-select workflows and a review system supporting multi-image uploads.
- Implemented Google Maps navigation, infinite-scroll pagination, and date-based filtering for logistics delivery management screens.

Selected Projects

FUNZCART / CloudPOS Web | Multi-tenant e-commerce platform | Next.js

Built and maintained a multi-tenant Next.js platform with production theme packs and client storefronts including Luzine Bakes. Designed dynamic filters, live search, reviews with multi-image uploads, guest checkout, inline OTP verification, COD, WhatsApp notifications, and Razorpay payments.

Juice World | Production storefront | Next.js, i18n, ISR

Developed an API-driven storefront with English and Arabic localization, full RTL support, ISR caching, dynamic SEO metadata, sitemap generation, server component architecture, and optimized product experiences.

Connect App | Business networking application | React Native

Built company profile management, connection request workflows, subscriptions, deep linking, profile sharing through shortened URLs, group navigation, and username auto-sync.

Ganvin | Logistics and delivery ecosystem | Flutter

Built Executive and Customer apps with Google Maps navigation, infinite-scroll pagination, Razorpay payments, and production issue resolution with the backend team.

EPOSMOB | Mobile POS and inventory management | Flutter

Developed billing, Day Close workflows, bilingual receipt printing, stock reports, purchase orders, and supplier and customer management for retail operations.
