Professional Summary

Cross-platform mobile and frontend developer with production experience using Flutter, React Native, React.js, Next.js, TypeScript, JavaScript, and Dart. Delivered Android, iOS, and web features for POS, logistics, business networking, and e-commerce products. Hands-on experience includes REST API integration, payments, deep linking, Arabic and RTL localization, push notifications, maps, invoice printing, responsive interfaces, and production releases.

Technical Skills

Mobile Development: Flutter, Dart, React Native, TypeScript, Android, iOS, Deep Linking, Push Notifications

Frontend Development: React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Architecture and APIs: REST APIs, SSR, ISR, Dynamic Routing, Multi-Tenant Architecture, State Management, i18n, RTL

Integrations: Razorpay, Algolia Search, Google Maps, reCAPTCHA Enterprise, WhatsApp Notifications, Barcode Generation

Tools and Databases: Git, GitHub, Postman, Figma, MySQL, SQLite, Python, Django

Work Experience

ENKE Consulting Services LLP | Apr 2026 - Present | 5 mos

Junior Application Developer | Jul 2026 - Present | 2 mos

- Developed Flutter POS workflows for billing, inventory, purchase returns, packing, shipping, Day Close, and bilingual receipt and invoice printing.
- Implemented Arabic localization and RTL layouts across core POS, reporting, settings, and account workflows.
- Built Flutter logistics features including Google Maps navigation, Razorpay payments, push notifications, pagination, maintenance handling, in-app updates, and release validation.
- Developed React Native company profiles, connection and subscription workflows, reCAPTCHA Enterprise, profile sharing, and Branch deferred deep linking across Android and iOS.
- Built Next.js e-commerce experiences with multi-tenant theming, Algolia search, dynamic filters, checkout, SSR and ISR caching, SEO metadata, and responsive layouts.

Full Stack Developer Trainee | Apr 2026 - Jul 2026 | 3 mos

- Integrated REST APIs for authentication, product catalogs, orders, checkout, payments, and user profile workflows across web and mobile applications.
- Built reusable responsive components, dynamic product filters, review image uploads, pagination, and API-driven storefront content.

Education

Bachelor of Computer Applications (BCA) | 2023 - 2026

Priyadarshini Arts and Science College, Melmuri, Malappuram | University of Calicut

Projects

FUNZCART / CloudPOS Web | Multi-Tenant E-Commerce Platform (Next.js)

Built a multi-tenant Next.js platform with 8+ production theme packs. Implemented Algolia search, category-driven filters, reviews with image uploads, responsive checkout, OTP verification, Razorpay payments, and WhatsApp order notifications.

Connect App | Business Networking Application (React Native)

Built company profiles, connection requests, subscriptions, shareable URLs, reCAPTCHA Enterprise, and reliable Branch deferred deep links for Android and iOS.

EPOSMOB | Mobile POS & Inventory Management (Flutter)

Developed billing, inventory, purchase return, packing, shipping, reporting, and bilingual printing features. Added Arabic localization and RTL support across core workflows.
