

MUHAMMED MUBASHIR K

Flutter Developer | Dart | Android | iOS | REST APIs

Kerala, India | muhammedmubashir720@gmail.com | +91 8089433955 | github.com/MuhammedMubashir-dev | linkedin.com/in/muhammed-mubashir-k | muhammed-mubashir-portfolio.netlify.app

Professional Summary

Flutter Developer with production experience building cross-platform Android and iOS applications for mobile POS, inventory management, logistics, and e-commerce products. Delivered billing, purchase return, packing, shipping, reporting, bilingual printing, Arabic and RTL localization, Google Maps, Razorpay payments, push notifications, in-app updates, and production release fixes. Experienced with REST APIs, responsive UI development, state management, Git, and collaboration with backend teams.

Technical Skills

Flutter Development: Flutter, Dart, Reusable Widgets, Responsive UI, State Management

Mobile Platforms: Android, iOS, Release Builds, Deep Linking, Push Notifications, In-App Updates

Architecture and APIs: REST APIs, Authentication, JSON, Pagination, Error Handling, Backend Integration

Integrations: Razorpay, Google Maps, Barcode Generation, Bilingual Printing, Arabic Localization, RTL

Tools and Databases: Git, GitHub, Postman, VS Code, Figma, MySQL, SQLite

Work Experience

ENKE Consulting Services LLP | Apr 2026 - Present | 5 mos

Junior Application Developer | Jul 2026 - Present | 2 mos

- Developed Flutter POS workflows for billing, inventory, purchase returns, purchase orders, packing, shipping, Day Close, and stock reporting.
- Implemented Arabic localization and RTL layouts across billing, sales, reports, settings, account, supplier, and customer workflows.
- Built bilingual receipt and invoice printing, fractional quantity handling, SKU search, and ZATCA-related order failure alerts.
- Delivered Flutter logistics features including Google Maps navigation, Razorpay payments, push notifications, pagination, maintenance handling, and in-app updates.
- Diagnosed Android and iOS release issues, API edge cases, authentication failures, date handling, and production UI defects.

Full Stack Developer Trainee | Apr 2026 - Jul 2026 | 3 mos

- Integrated REST APIs for authentication, profiles, product catalogs, orders, checkout, payments, and delivery workflows in Flutter applications.
- Built reusable responsive interfaces with pagination, location management, date filters, image handling, and backend-driven data.

Education

Bachelor of Computer Applications (BCA) | 2023 - 2026

Priyadarshini Arts and Science College, Melmuri, Malappuram | University of Calicut

Projects

EPOSMOB | Mobile POS and Inventory Management (Flutter)

Developed billing, inventory, purchase return, packing, shipping, reporting, bilingual printing, and ZATCA-supporting workflows with broad Arabic localization and RTL support.

Ganvin | Logistics and Delivery Applications (Flutter)

Built customer and delivery applications with Google Maps navigation, location management, Razorpay payments, notifications, pagination, in-app updates, and production issue fixes.

FUNZCART and Luzine Bakes | Mobile Commerce Features (Flutter and APIs)

Integrated authentication, profiles, product catalogs, carts, checkout, payments, order workflows, and responsive customer-facing interfaces.
