Summary

Junior full stack developer with six production apps shipped at ENKE Consulting since April 2026 and 118 merged pull requests across Flutter, React Native, and Next.js codebases. Flutter is my main stack: point-of-sale, delivery, and customer ordering apps with payments, bilingual interfaces, and regression tests. I also build the other layers, with Next.js storefronts at work and a Node.js, Express, and PostgreSQL backend for my own marketplace project, and I ship complete flows with the loading, empty, error, and retry states handled.

Shipped at ENKE Consulting (production, since April 2026)

EPOSMOB | Flutter point of sale | 86 merged PRs since July 2026

- Consolidated 25+ list and report screens onto one shared listing UI with validated Excel export that fetches every page and rejects duplicate or incomplete results.
- Cut client-reported restaurant order lag from 7-8 s to 2-4 s per action by removing fixed waits and duplicate order-list downloads; built Day Close with cash-denomination validation and bilingual English/Arabic receipts and PDF invoices.

EPOSMOB case study

Ganvin Customer and Executive | Flutter delivery apps

- Integrated Razorpay checkout with correct confirmation states, plus optional and mandatory update prompts and a maintenance mode; cut order-history API calls from six to two by reusing responses.
- Implemented independent pagination and date filters per delivery stage, fixed OTP and endless-loading failures, and traced missing orders to a server timezone mismatch with the backend team.

Ganvin case study

Connect App | React Native, Kotlin, Swift

- Implemented LinkedIn sign-in with PKCE and native modules on Android and iOS, kept deferred deep links alive through app startup, and added authentication regression tests.

CloudPOS and Juice World | Next.js storefronts

- Delivered tenant-aware Stripe and Razorpay checkout, eight theme packs, a QR table menu, and an English/Arabic right-to-left storefront with ISR and SEO metadata.

Personal projects (built end to end)

Laundry pickup and delivery marketplace | Flutter, Express, PostgreSQL | 2026, private repos, demo on request

- Three Flutter apps (customer, rider, shop) in one Dart workspace sharing a core package: dio client with rotating refresh tokens, Socket.io live tracking, OTP login, and Firebase push wired behind config.
- Express 5 API on PostgreSQL with PostGIS nearby-shop search, pickup slots, rider assignment, and an end-to-end order-flow test; React and Vite admin panel for shops, riders, and orders.

StockFlow | Offline-first Flutter inventory app | public, GitHub Actions CI, Android release

- Riverpod state with repository, domain, and presentation layers; responsive Material 3 for phone, tablet, and web; English/Arabic RTL; light and dark themes; widget tests on the dashboard flow.

github.com/MuhammedMubashir-dev/stockflow-flutter

Next.js e-commerce store | live on Vercel

- App Router storefront with ISR, Algolia typo-tolerant search, category filters, persistent cart and checkout, and React Hook Form with Zod validation.

nextjs-ecommerce-amber.vercel.app

Skills

Mobile: Flutter, Dart, Provider, Riverpod, React Native, TypeScript, Android and iOS releases

Web: React, Next.js, Tailwind CSS, ISR, SEO

Backend and data: Node.js, Express, PostgreSQL and PostGIS, REST APIs, JWT, Socket.io, Firebase

Practice: Unit, widget, and regression tests; GitHub Actions CI; Postman; Git; AI-assisted development with Claude Code and Codex, every change reviewed

Experience

ENKE Consulting Services LLP, Kerala | Apr 2026 - Present

- Junior Full Stack Developer (Jul 2026 - Present, permanent from Oct 2026): feature development across POS, delivery, and commerce products; API contracts agreed with backend developers before building screens.
- Full Stack Developer Trainee (Apr - Jul 2026): Flutter interfaces and REST integration for pickup and delivery workflows; shared React and Next.js storefront components. Promoted after three months.

Education

Bachelor of Computer Applications | 2023 - 2026

Priyadarshini Arts and Science College, Melmuri, Malappuram | University of Calicut
