

MUHAMMED MUBASHIR K

Flutter Developer

Malappuram, Kerala, India | +91 8089433955 | muhammedmubashir720@gmail.com

Portfolio | GitHub | LinkedIn

Professional Summary

Flutter developer with company experience building and maintaining POS, customer ordering, and delivery applications using Dart, Provider, and REST APIs. Contributions include cash management, bilingual printing, payments, reporting, and regression tests. Additional React Native experience covers Android and iOS authentication and deep linking.

Technical Skills

Mobile: Flutter, Dart, Provider, ChangeNotifier, setState, React Native, responsive UI

Integrations: REST APIs, JSON, Razorpay, Google Maps, PDF and USB receipt printing, Arabic and RTL

Engineering: Git, GitHub, Postman, unit and widget tests, pagination, API error handling

Supporting web: React, Next.js, JavaScript, TypeScript, Tailwind CSS, Stripe, ISR, i18n

Work Experience

ENKE Consulting Services LLP | Apr 2026 - Present

Junior Full Stack Developer | Jul 2026 - Present

Full Stack Developer Trainee | Apr 2026 - Jul 2026

- Contribute features and fixes across company mobile and web applications; collaborate with backend developers on API contracts and review changes through Git pull requests.

Selected Company Projects

EPOSMOB | Retail POS and Inventory | Flutter, Provider

- Built shift opening and Day Close workflows with cash-denomination calculations and pending-close alerts; implemented purchase-return, packing, and shipping workflows.
- Developed responsive reporting and transaction listings with shared filters and Excel exports that fetch all matching pages and reject duplicate or incomplete results.
- Fixed English/Arabic invoice rendering, USB printing, barcode pricing, and variant stock isolation; guarded invoice loading against stale responses and added regression tests.

Ganvin Customer | Laundry Ordering and Tracking | Flutter, Provider

- Integrated Razorpay checkout and corrected payment-confirmation messaging; reduced My Orders API requests from six to two by reusing responses for lists and counts.
- Added optional and mandatory update prompts and maintenance handling; improved cart responsiveness, authentication navigation, and saved-address management.

Ganvin Executive | Staff Pickup and Delivery | Flutter, setState

- Implemented independent pagination and date filters across four delivery stages, Google Maps navigation, and saved locations; improved six-digit OTP entry and empty/error loading states.

Connect App | Business Networking | React Native, TypeScript

- Implemented LinkedIn login on Android and iOS using PKCE and native authentication modules; resolved deferred deep-link startup and navigation issues.

Supporting Web Experience

CloudPOS and Juice World: contributed Next.js storefront themes, tenant-aware Stripe checkout, Razorpay integration, English/Arabic localization, ISR, and SEO metadata.

Education

Bachelor of Computer Applications | 2023 - 2026

Priyadarshini Arts and Science College, Melmuri, Malappuram | University of Calicut
